## CHALLENGE - SUSTAINABLE PACKAGING FOR FRAGILE GOODS

Hammond's Candies was using foam packaging that was land fill disposable. To comply with the companies values a more sustainable solution was needed to deliver the fragile candy canes and other sweets safely to their customers. Additionally a packing station to ensure ergonomic workflows had to be installed utilizing the available space efficiently.

## SOLUTION -

# PAD LOC® RENATURE®, AIRplus® Cushion and SMARTline Packing Stations

Made from compostable film, air, and plant-based padding material, the sustainable PAD LOC® RENATURE® cushioning pads offer perfect protective packaging for Hammond's Candies fragile sweets. The cushioning pads adapt to the shape of the shipping goods and prevent them from sliding around inside the package. A compression system to remove the air from the cushioning pads reduces the candy canes ability to move during shipping transit which has significantly reduced Hammond's damage rate.

Depending on the product, AIRplus® cushions may also be used. A perfectly integrated SMARTline Packing Station ensures ideal work flows and ergonomics in the packing area.

Safe and sustainable:  
Candy canes cushioned  
with PAD LOC® RENATURE®  
from Storopack.

### Easy to use:

AIRplus® Cushion film perfectly protects Hammond's Candies lollipops.

## RESULT -

# LOWER COSTS, HIGHER EFFICIENCY

Thanks to Storopack, Hammond's Candies are now shipped using a compostable solution that's much more sustainable than the old solution, foam packaging. Welcome secondary effects include reduced costs per shipping carton and a more efficient packaging system.
